To Whom It May Concern:

It is my pleasure to strongly recommend **Guillaume Rachet** for Front End React.js development.

I am Gilles Gerlinger, a manager at Nokia. I have 30 years of experience working in IT and have seen many young professionals come and go. Guillaume Rachet is one individual I have worked with who stands out.

During our 3 years together, he displayed great talents in clean code, autonomy, and project management. When we first met, I was very satisfied with his abilities, but during the time we worked together, his understanding of Javascript development grew more than that of his peers.

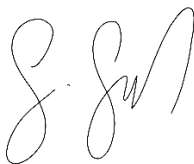

His fluency in English was perfected during his management of two major projects with international clients. He is the person I have always counted on to take on the toughest jobs. He was able to find the right technical solutions to complicated asynchronous file management problems.

It's not just his technical skills, however. Guillaume Rachet was a joy to work with because of his positive attitude and communication skills. His understanding of responsibilities was also necessary and valued not just by me, but by his peers, who often relied on him to get the job done.

I am absolutely confident that Guillaume Rachet would be a great fit for your company. Not only will he bring the kind of skills and experiences you're looking for in an applicant, but he will also quickly become an asset.

If you need more information or specific examples, please do not hesitate to contact me. As a recommendation letter provides only a snapshot of his talents and achievements, I would be happy to further elaborate on my time working with him.

Sincerely,
Gilles Gerlinger
