Application for the position of Junior Software Engineer (303527)

I would like to apply for the position of Junior Software Engineer (303527). I have 3 years of experience as a React.js frontend developer in an apprenticeship and fit the advertised job requirements.

I received this month my master's in Development and Software Engineering from the Aforp institute in France.

In my current role at Nokia, I am responsible for two major projects with international internal clients where I perfected my fluency in English and my communications skills.

I am currently in Paris finishing my working contract. I will move and be available in Dublin on the 14th of October.

Please find my resume attached. Feel free to contact me if you have any further questions you would like to discuss.

Thank you for taking the time to consider my application.

I look forward to hearing from you.
